The Saint Charles Convention Center is doing their part to keep guests and employees safe with the recently finished install of an air ionization system, [AtmosAir](#), which is proven to neutralize 99% of Covid-19 within thirty minutes of exposure. The technology is designed to purify indoor air to its natural state by neutralizing airborne and surface contaminants such as Covid-19, viruses, odors, bacteria, germs, and dust. As a second layer of protection, Fresh-Aire UV was also installed, which will neutralize any remaining air contaminants after passing through the AtmosAir technology. Along with the new air systems that have been installed, the Saint Charles Convention Center is also practicing numerous safety procedures including physical distancing, continuous sanitization and the requirement of masks. All attendees for the Swine N' Soul event will be required to wear a mask when not directly eating or drinking. For more information about the preventative measures being taken at the Saint Charles Convention Center please visit their websites [Covid-19 Update](#) page.
